The following is the list of East Asian linguistics-related publications (as of February 2016) by our seven DEALL ‘East Asian Linguistics’ faculty members’ (Chan, Nakayama, Noda, C. Quinn, Unger (Emeritus), Xie, & Yuasa). It shows not only our faculty members’ expertise, but also which issues have been investigated by them. Please note that the list does not include any linguistic reviews, abstracts, and encyclopedia entries, non-EA linguistics-related articles, and Pedagogy publications. Also it does not include translated books as separate entries.
